### Online Fretboardtool For Guitar/Bass Teachers And Students

Hi... I made this Fretboardprinter, so I can print and teach myself about scales and chords in different positions.

And I am happy to share this with You.

**What is this ?**  
Basically it is a online drawingtool with a printbutton and save-options.

**What does it give you ?**

- An easy way to print out homework for your self or your students.
- While discussing scales and cords on the internet, you can hand out links to your own drawings.

**Click on the samples**  
and start making your own boards

A Blues

C-Maj7 in 4 positions

Empty board  
(for manual drawing)

**Have Fun !**  
Peter Heinzl
